MAY 2017

COLLABORATION WORK IBTec AND WOOLCOCK INSTITUTE OF MEDICAL RESEARCH

Sandra Grau Bartual, a PhD candidate at IBTec, spent four weeks in Sydney for collaboration work at Woolcock Institute of Medical Research. Her research involves the investigation into the upper airway humidification. Experiments were conducted at Woolcock laboratories which focussed on the analysis of biological cell culture behaviour under desired scenarios. She was part of the Respiratory Technologies Group working closely with all staff and PhD students in a pleasurable atmosphere.
