MARCH 2017

INTERNS FROM YAMAGUCHI UNIVERSITY

Kentaro
Oshiro

Prof Ahmed
Al-Jumaily

Kodai
Kuranai

IBTec has a Memorandum of Understanding with Yamaguchi University in Japan for collaborative work. Every year they send a couple of interns to IBTec for work experience. This year Kentaro Oshiro and Kodai Kuranai visited for a period of three weeks. During this they worked on their research. Kentaro's research title: "Relationship between dynamic response and vibration characteristics of an elastic support roller system on fine coal." Kodai's research title: "Examining blood vessel dynamics model in consideration of wall thickness and elastic changes."

INTERN FROM FRANCE

Annaëlle LAPOUGE is a 23 year old French student girl. She is actually carrying out a five month internship at IBTec to validate her second year of a master's degree. She is studying biomedical engineering at Paul Sabatier University in the South of France (Toulouse). The project Annaëlle is going to work on is the development of a pulse oximeter to diagnose acute exacerbations. This sensor would be integrated as part of a neck or wrist band. She loves to discover new countries and people.
